## **DETAILED ACTION**

### ***Drawings***

Figure 5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is vague and indefinite. On lines 14-16, the phrase "*no wall is provided between the rotation shaft and a contact area...are in contact with each other*" is unclear. What structure are applicants claiming? If there is no wall between the shaft and the contact area, what structure allows the first and second rotatable body to be in contact with each other?

### ***Allowable Subject Matter***

Claims 1-11 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

***Response to Arguments***

Applicant's arguments filed May 4<sup>th</sup>, 2006 have been fully considered but they are not persuasive.

With respect to applicant's remarks on pages 3-4 regarding the conventional art, it should be noted that a claim should positively set forth the structure of the invention. A claim is not supposed to be a comparison between the instant invention and the conventional art. Further, referring to just the drawings of the conventional art, it appears that there is "no wall" structure between the rotation shaft 1 and the contact portion 57 in a radial direction. Thus, it is unclear as to what is being eliminated. Therefore, in this case, the boundaries have not been clearly set forth as asserted by the applicant.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
